- Protective Welts:** Heavy Weight Fire Retardant treated, heat resistant Split Cowhide Protective Welts. The thumb and forchette seams are welted to protect threads and stress areas
- Origin:** Made in U.S.A.

### **Sizes:**

S, M, L, XL, J

### **Design & Construction:**

The glove shall be a Gunn cut pattern with wing thumb construction. A completely sewn, one-piece liner is permanently affixed to the glove shell in the fingertips and wrist areas. This prevents any lining pullout and creates a uniform inside lining even after repeated use in fire fighting conditions. The glove extends 2" above the wrist crease and has a shirred elastic snugger at the wrist to create a better fit.
